

HOW TO

WCCTV WIRELESS CCTV

Secure Your Construction Site

BY CONSTRUCTION SECURITY EXPERTS, WCCTV

With the presence of high-value plant machinery and equipment, UK construction sites remain a common target and are particularly vulnerable to theft and other crimes, especially when they are not adequately protected. Crime can cause significant problems, including project delays and financial losses, which can be detrimental to small or medium sized businesses.

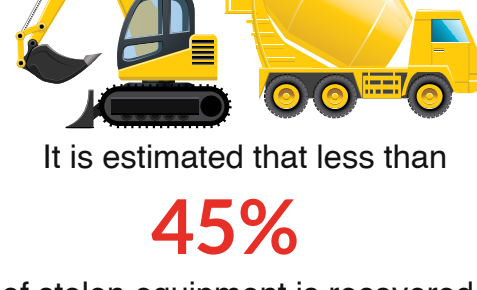

FACTS AND FIGURES

The construction industry loses **£800m** per year due to theft and vandalism

92% of UK construction site managers report they have been affected by theft.

It is estimated that less than **45%** of stolen equipment is recovered.

WHAT ARE THE MOST STOLEN ITEMS ON CONSTRUCTION SITES?

POWER TOOLS

BAGS OF CEMENT

FUEL

PLANT MACHINERY

MATERIALS

OFFICE EQUIPMENT

CABLES

METALS

HAND TOOLS

DIESEL/WATER BOWSERS

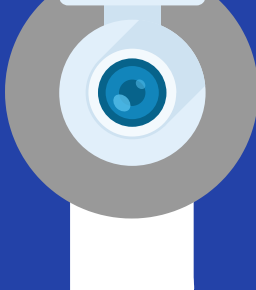

GENERATORS

TIMBER

EFFECTIVE WAYS TO SECURE YOUR CONSTRUCTION SITE

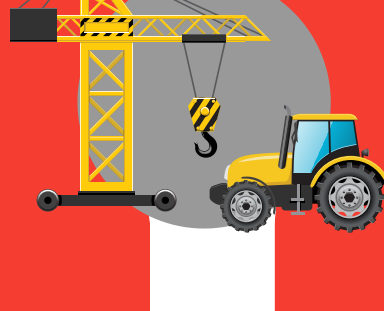

1 CCTV SYSTEMS

CCTV is a visible deterrent to thieves, and when supported by remote alarm monitoring they act as a virtual security guard protecting your site around the clock.

2 TER REGISTER

Mark valuable equipment and register it with the National Plant and Equipment Register (TER), making it easier to track and return stolen items.

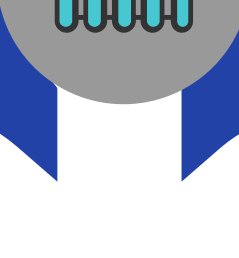

PROVIDES INFORMATION FOR POLICE TO CHECK AND RECOVER

IDENTIFIES STOLEN EQUIPMENT

INCREASE THE POSSIBILITY OF RETRIEVING STOLEN EQUIPMENT

DETERS THEFT OF PLANT EQUIPMENT

National Plant and Equipment Register

3 SECURE FENCING

Surrounding your compounds with secure fencing, gates, or hoarding will prevent easy access to your sites and block opportunist thieves from seeing what is on your site.

4 REGULAR STAFF CHECKS

Carry out regular employee background checks, including making CSCS SmartCards mandatory for all site workers. Staff should also be trained in how to mitigate security risks and report crimes.

5 LIGHTING

Invest in high-quality lighting and fencing systems to illuminate the site and restrict perimeter access.

6 REMOVE KEYS

Remove keys from vehicles and machinery where left unattended and invest in vehicle immobilising equipment to prevent theft.

7 SECURE STORAGE

Ensure your construction site has excellent storage facilities, complete with secure locking or electrical safety systems.

8 ACCREDITED INSTALLERS

Only work with accredited security installers and suppliers, as well as ensuring all technology is kept up-to-date and maintained.

WHY SHOULD YOU INVEST IN CONSTRUCTION SECURITY?

REDUCE THEFT AND VANDALISM

IMPROVE HEALTH AND SAFETY

PREVENT UNAUTHORISED ACCESS

SAVE TIME AND MONEY
