WCCTV 4G MULTICAM DOME

The WCCTV 4G MultiCam Dome is a Redeployable CCTV camera that delivers multidirectional video surveillance utilising 4G video transmission technology. The MultiCam Dome is the ideal surveillance solution for traffic management applications and helps monitor public spaces for fly-tipping and anti-social behaviour.

The system features an 8 MP multi-sensor camera that provides the user with four different video streams with just one unit to install, one cable to draw and one IP address, helping to minimise installation, maintenance and transmission costs.

All live and recorded images can be accessed remotely via 4G mobile technology. The MultiCam Dome is easy to install onto a lamp post or building and can easily be moved to a new location to target crime hotspots or if your surveillance requirements change.

The system's in-built video analytics provides visual verification and alarms for a range of intelligent monitoring applications such as traffic build-up, intruder detection, loitering and more.
