# WCCTV 4G IR MINI DOME

WCCTV's 4G IR Mini Dome is a redeployable CCTV camera designed to deliver live and recorded high definition video using 4G mobile transmission. As an all-in-one surveillance system, it combines an infrared PTZ camera, local recording capacity (up to 4TB) and 4G transmission technology into a single, lightweight unit.

Live and recorded footage from the cameras can be accessed via 4G, 3G and Wi-Fi connectivity, allowing users to remotely view and download the video via smartphone, tablet, laptop, or a CCTV control room.

The unit features three additional input channels, allowing for secondary cameras such as ANPR cameras, PTZ cameras or static cameras to be bolted-on. These cameras are able to share the 4G connectivity and internal storage of the 4G IR Mini Dome.

The camera also contains inbuilt video analytics functionality to deliver automated surveillance functionality such as intrusion detection, loitering and vehicle tracking.
