MORGAN SINDALL / NETWORK RAIL: KINGS CROSS -
WORKER SAFETY AND TIME LAPSE VIDEO

CASE STUDY: MORGAN SINDALL / NETWORK RAIL KINGS CROSS WORKER SAFETY & TIME LAPSE VIDEO

[Click to see full case study](#)

CASE STUDY BACKGROUND

Morgan Sindall and **Network Rail** collaborated to transform travel to and from Kings Cross Station via a multi-million-pound track renewal, signalling, and overhead line equipment replacement project.

THE CHALLENGE

Due to COVID-19 Network Rail had to re-plan the project to ensure adherence to restrictions and safe working practices. Including adjusting staff numbers, social distancing rules, amending processes and procedures, and adding on-site COVID testing.

To ensure the measures implemented were fully adhered to, Network Rail and Morgan Sindall required a project overview tool that could be used to monitor the site. The system would be used to remotely view updates, review health and safety procedures and evaluate any accidents or safety breaches.

A time lapse video was needed to capture the detail and significant engineering feat accomplished throughout the remodel.

THE SOLUTION

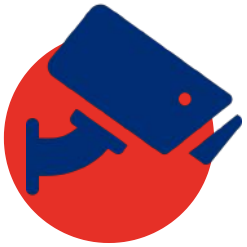

WCCTV RAPID DEPLOYMENT DOMES

- ① WCCTV installed three 4G IR Speed Domes to provide project overview footage.
- ② This truly all-in-one surveillance system, combines a PTZ camera, local recording capacity (up to 4TB) and wireless transmission through 4G/3G and Wi-Fi.
- ③ The system is easy to install, easy to maintain, and can be moved to new locations to meet changing requirements.

WCCTV TIME LAPSE SOLUTION

TIME LAPSE VIDEO CAMERAS AND PRODUCTION

High-Quality Time Lapse Video Cameras - up to 4K

Full post-production and video editing to your specification

Standalone service or as an add on to your managed site security package

Showcase your projects and celebrate the achievements of your teams

High PR and marketing value

Ideal for presentations, board room meetings, websites, blogs and social media

Solar Power	—	—	—	—	✓	—
Up to 4TB Storage	✓	✓	✓	✓	✓	✓
ANPR	—	✓	—	—	—	—

THE RESULT

The WCCTV 4G IR Speed Domes ensured that safety protocols were adhered to throughout the project. The ability to remotely access the live and recorded footage to check the progression of the works was an invaluable site management tool.

It enabled the site team to view live video during key progression works to ensure work was completed on time and deal with any incidents effectively.

Both Network Rail and Morgan Sindall then shared the time lapse video on their websites and across social media, generating engagement with over 5,000 views.
