Protecting Your Construction Site with WCCTV's Advanced Surveillance Solutions

Securing your construction site is essential to preventing theft, vandalism and unauthorised access, which can lead to costly project delays and increased insurance premiums. It is also critical for ensuring the safety of on-site staff and the wider public.

At WCCTV, we specialise in providing wireless, rapid-deployment surveillance solutions tailored for construction sites and infrastructure projects. Our market-leading Mobile CCTV Towers, live video monitoring and remote security solutions offer a proactive approach to site protection, eliminating the need for fixed infrastructure.

Designed to deter criminal activity and enhance your site's safety, WCCTV's advanced security technology helps you minimise financial losses, prevent disruption to your project and ensure compliance with industry regulations — giving you total peace of mind.

Why choose WCCTV?

- **Market-leading** wireless CCTV solutions
- **Fully-Managed Service**
- **24/7/365** remote monitoring
- **Rapid Deployment & Nationwide Support**
- **Integrated AI analytics**
- **Cost effective** alternative to guarding
- **Solar & battery** powered options
- Integrated solutions for **full-site coverage**

At WCCTV, we leverage over 20 years of industry expertise, cutting-edge technology and a comprehensive range of wireless surveillance solutions to deliver a rapid and effective security response tailored to your construction site's needs.

Reduce Security Costs by up to

88%

Rapid Deployment CCTV Towers

Our Rapid Deployment CCTV Towers provide instant, high-quality security coverage for any site. Standing 6m tall and painted bright yellow, they act as a visible deterrent, warning intruders that your site is protected by live monitored CCTV.

Our towers are backed by remote monitoring services to help minimise false alarms on-site, ensuring that only real threats are responded to promptly. With HD cameras, infrared capability and wireless video transmission, you get a complete security solution without needing power or internet on-site. This means we can secure construction sites in even the most remote locations. Choose from multiple powering options, including solar energy and eco-friendly fuel cells for total flexibility. Whether you need temporary security or a long-term surveillance solution, CCTV Towers deliver reliable protection wherever you need it.

With WCCTV's market-leading wireless security solutions, you can ensure complete protection for your assets, personnel and equipment from every angle.

Our ultra-reliable managed security services can save up to **88%** when compared with the cost of traditional guarding services, without compromising results.

We back our CCTV systems with a **full service** that includes installation, maintenance, alarm monitoring, connectivity, support and ongoing reporting.

With our camera **rental options**, you only need to pay for security when needed. No need to worry about transporting the Towers from job-to-job: we'll deliver and take it away.

At **6m tall** and **bright yellow**, our CCTV Towers are an unmistakable presence on your sites - warning intruders that your site is under our watchful eye.

Redeployable CCTV Cameras

WCCTV's Redeployable CCTV Cameras provide an ideal security solution for construction sites, offering flexible, high-performance surveillance without the need for fixed infrastructure. These portable, all-in-one units feature a high-definition PTZ (Pan-Tilt-Zoom) camera, wireless video transmission, onboard storage and AI-powered analytics.

One of the key benefits of our Redeployable Cameras is their ability to be relocated as your construction project progresses. Unlike fixed CCTV systems, these cameras can move with your site, ensuring consistent security coverage from start to finish. They provide 24/7 monitoring for threats such as unauthorised access, theft and vandalism.

The wireless connectivity of WCCTV's Redeployable Cameras enables remote access to live and recorded footage via WCCTV's secure platform or mobile app, allowing site managers and security teams to monitor construction sites from anywhere. Integrated AI-powered video analytics enhance efficiency by detecting suspicious activity, and reducing false alarms.

Our Redeployable Cameras can be installed and operated in **under 20 minutes**, providing a dynamic response to emerging and developing crime patterns.

WCCTV's unique **mobile transmission technology** allows you to access footage from your cameras via our desktop software and smartphone app anytime, anywhere.

All of our redeployable units feature **three** additional input channels, allowing for bolt-on solutions such as **ANPR** cameras and blue light alarms to be added.

With our cameras we provide a built-in remote diagnostics tool, **WCCTV Heartbeat**, which continually checks the camera is performing to optimal levels.

Time Lapse Video Solutions

WCCTV provides high-quality Time Lapse Video filming services to construction and demolition sites that help bring your projects to life and document your unique journey. Our team of professional engineers and video editing experts will work closely with your team to understand your objectives and key milestones to ensure you receive a video that captures your project perfectly.

A key feature of our time lapse solutions is the ability to access live footage remotely. Through our intuitive mobile app and desktop software, clients can monitor ongoing work from any location, facilitating real-time oversight and timely decision-making.

Understanding the dynamic environments of construction sites, WCCTV's Time Lapse Cameras are designed for autonomous operation. They can function independently of external power sources and internet connectivity, making them versatile for various site conditions. Upon project completion, our professional video editing team enhances the captured footage by incorporating design elements, resulting in a polished and engaging final product.

WCCTV's specialist Time Lapse Video Cameras capture stunning images in ultra-high definition **up to 4k**, helping to bring your projects to life like nothing else.

Provides you with the ability to keep track of your projects through remote access at any time from anywhere with our **free** mobile app and desktop software.

Following completion of your project, we enhance the footage with **editing services** including adding music, animation, images, text overlays and more.

Time Lapse Videos are an **excellent way of marketing** your construction business through social media and engaging with key stakeholders to keep them engaged.

Site Condition Monitoring Solutions

Site condition monitoring is vital to ensuring your site, the local area and the environment are protected against the dangers created from demolition and construction.

Available with all of our security solutions, our site condition monitoring sensors track key data such as emissions, noise and weather conditions and will trigger alerts if levels are above the predefined rule set by yourself.

Implementing a site condition monitoring sensor is simple, especially with WCCTV. They can be attached to our products and offer measurements for:

- Weather conditions
- Decibel levels
- Particle monitoring
- Local Air Quality Management (LAQM)
- Co2 emissions

Their use helps to keep you within safety levels, prevent complaints, and avoid costly fines and work stoppages which can disrupt your construction sites' operations.

With our site condition monitoring, you're able to preset limits to ensure you stay within the safety range specified for your site, protecting the public and environment.

If preset limits are surpassed, our sensors will trigger, promptly informing you of this, so that you can react quickly to resolve the matter and avoid potential fines.

Our IoT sensors help to monitor and track weather conditions, providing you with evidence that can be presented to clients if delays are faced due to this.

Site condition monitoring allows you to maintain positive community relationships, prevent financial penalties, and help keep your construction site on schedule.

Additional Security Solutions

| Security Solution | Description |
|---|---|
|  ANPR Cameras | Tracks and records vehicle movements, preventing unauthorised access to construction sites and infrastructure projects. |
|  Thermal Imaging Cameras | Detects heat signatures for intrusion detection in low-light conditions or fire prevention on construction sites. |
|  AI-Driven Video Analytics | Intelligent surveillance that reduces false alarms, detects unauthorised access and enhances security response times through automated alerts. |
|  Protect Bodycam Solutions | Wearable security solutions to ensure the safety of remote and isolated workers, with real-time monitoring and emergency alerts. |
|  Evidence Management Software | Our Evidence Management Software (EMS) is designed to provide users with a simple solution for managing digital files captured by a WCCTV Body Worn Camera. |
|  Software Solutions | Our software allows you to add cameras, control them, create automated tours, receive alerts and view live and recorded footage at any time, anywhere. |
|  Stellifii Monitoring & Data Platform | Stellifii is a UK Manufactured 5G-ready platform that combines video streaming with smart city applications in a cloud-based ecosystem. |
